

# Usability Tasks

1. Search for a 'Star Wars' themed Lego Sets released from '2006' onwards and view the Set with the highest number of pieces and view open one of the 'Lego Set Instructions' and then close the instructions
2. Now view the set's Piece Checklist and check the following off the checklist:
  - a. All 'Yellow' Pieces
  - b. All 'Bricks Wedged'
  - c. All 'Reddish Brown' 'Bars, Ladders and Fences' and 'containers'

Now export the checklist and Return to the home page

3. Create an account with username 'PID@test.co.uk' and password 'PID', where PID is your Participant ID, and login to this account
4. Find the Set with Set Number '75310-1' and add the set to the Set List 'Sets Owned List'
5. Go to the 'Set Lists' page and create an new Set List 'Star Wars'
6. View the list 'Sets Owned List' and add the set 'Duel on Mandalore' to the Set List 'Star Wars' and then delete it from the current set list
7. Change the name of 'Sets Owned List' to 'Indiana Jones'
8. Now Search for 'Indian Jones' Lego Sets made before '2009' and with less than '500' pieces, and add 3 sets to the Set List 'Indiana Jones'
9. Search for the set 'Hogwarts Castle' made between '2005' and '2015', and add the set with the smallest number of Pieces to a new Set List 'Harry Potter'
10. Return to the Set Lists page and sort by 'Number of Sets' ascending and then 'List Name' descending and delete the top Set list
11. Open Set list 'Indiana Jones' and view only sets with more than '200' pieces, and sort the list by 'Set Name' descending and go to the piece checklist for the top set. Then check some pieces off the checklist and then save the checklist and logout. Log back into your account, and view the set you just saved and check that your changes are still there
12. Import the Checklist you saved earlier and check your exported changes are applied, and then save this checklist

13. Now go and view your Sets in Progress and delete the set with the highest set number
14. Go to the profile page and change your email and password, then logout and login your new credentials, then delete your account
